

CITY OF WASHINGTON, ILLINOIS
City Council Consent Agenda Communication

Meeting Date: 5-20-2024

Prepared By: Dennis Carr – City Engineer

Agenda Item: Jackson Street Culvert Purchase Authorization

Discussion:

City Council has discussed the Jackson Street Pedestrian Bridge over the last year. The flared end sections for the culvert push the purchase price of the culvert to above \$15,000. Staff will also need to rent a larger excavator due to the size of the pipe sections and flared end sections. Leman quoted the materials around \$20,000 with a delivery fee included.

We were told it would take a few weeks to deliver. Staff will install upon delivery.

Fiscal Impact:

Staff budgeted \$50,000 in the general fund stormwater management account for this culvert/sidewalk project.

Action Requested: Staff requests approval to purchase the culvert materials for a price not to exceed \$25,000.
